

To improve

No.	To change	To be done
1	In Device management (under operations)	Keep only the following equipment: 1. Server management: ESXIH0st1 ESXIH0st2 ESXIH0st3 ESXIH0st4 2. Storage management: Storage1 Storage2 3. Network management Blade switch1 Blade switch2
2	On Dashboard Home > Dashboard System Overview Could not reach the infrastructure backend (Backend returned 503). Is the NestJS backend running on port 3001? A single at-a-glance view across everything this system tracks – servers, storage, switches, equipment lifecycle and open alerts – each pulled live from the same real data the dedicated pages use. Click any card to drill into that area.	Some info not displaying

3		Keep system status line only TIN and Branch , delete them
4		Remove that flag button
5	Reports Management	To ensure all reports are working
6		Remove that Logo and Replace by another one (sent separately)
7	Reports and Compliance	To discuss
8	Predictive Analytics & Resource Utilization	No data loaded
9	Support	To discuss
